

# Chapter 17 — Wayyiqtol Paradigm Drill

BBH Chapter 17 · Waw-Consecutive

Write the Wayyiqtol (waw-consecutive imperfect) form for each PGN. Root:  $\text{רָבַל}$ . Note: 1cs prefix waw takes qamets (1.) before aleph.

Wayyiqtol —  $\text{וַיִּרְבֹּל}$

| #  | PGN | Wayyiqtol form ( $\text{וַיִּרְבֹּל}$ ) |
|----|-----|-----------------------------------------|
| 1  |     |                                         |
| 2  |     |                                         |
| 3  |     |                                         |
| 4  |     |                                         |
| 5  |     |                                         |
| 6  |     |                                         |
| 7  |     |                                         |
| 8  |     |                                         |
| 9  |     |                                         |
| 10 |     |                                         |

Answer Key
