

Chapter 29 — Hophal Weak-Form Identification Drill

BBH Chapter 29 · Hophal Weak Verbs

Part A: identify conjugation, PGN, and root for each form (grouped by weak class, 5 items per group, 8 groups = 40 items).
Part B: identify the weak class first, then conjugation, PGN, and root (15 items). Items marked "(paradigmatic)" illustrate the paradigm and may not be directly cited from a biblical verse. Answer key is on the last page.

I-yod/Biconsonantal Hophal: uses י־ (shureq) not ק־. I-nun: dagesh forte in R2 (nun assimilated). III-he: ending ה־ (qatal 3ms) or י־ (3cp).
I-guttural: hateph vowel under R1 instead of simple shewa. Geminate: R2=R3; dagesh forte in final root consonant. III-n/y: qibbuts prefix;
R3 guttural refuses dagesh — patach under final n/y. III-aleph: qibbuts or shureq prefix; R3 aleph quiesces after qamets/tsere.

Reflection Questions

1. I-yod and Biconsonantal Hophal forms both use יֹ (shureq). What phonological rule explains this? Compare the Hiphil of the same classes (I-yod uses הֵי; Biconsonantal uses הֵן).
2. I-nun forms (items 11–15) have dagesh forte in R2. What happened to the נ? Is this the same assimilation as in the Qal/Hiphil of I-nun roots?
3. Items 13 and 19 are both from III-he roots (ה.כ.ג). One is wayyiqtol 3mp, the other imperfect 3ms. Compare their endings. Where did the III-he ה go in item 13?
