

Chapter 32 — Qal–Piel–Pual Contrast Drill (Strong Roots)

BBH Chapter 32 · Pual Strong Verbs

Each triplet shows the same root in Qal, Piel, and Pual (Perfect 3ms). For each form: (1) identify the stem, (2) parse fully, (3) translate. Focus on the R1 vowel: variable (Qal), hiriq/tsere (Piel), qibbuts/holes (Pual). Answer key is on the last page.

Stem contrast (Perfect 3ms): Qal = qamets or tsere under R1, no dagesh in R2. Piel = hiriq or tsere under R1 + dagesh forte in R2. Pual = qibbuts under R1 + dagesh forte in R2 (holes when R2 is guttural and rejects dagesh).

Reflection Questions

- Across all five triplets, the R1 vowel follows a pattern: qamets or tsere (Qal), hiriq or tsere (Piel), qibbuts (Pual). Write this as a three-step diagnostic rule.
- Root brk (triplets 1, 3): the resh (r) rejects dagesh forte in R2. How does this affect the Piel vowel (tsere under b instead of hiriq)? And the Pual vowel (holem instead of qibbuts)?
- Root kbd (triplet 4): the Qal is stative (he was heavy). What does the Piel add to make it factitive? What grammatical role does the human recipient play in Piel vs. Pual?
