

# BBG Chapter 14 — Relative Pronoun Parsing Drill

■ζ, ■, ■ — Gender/Number from Antecedent; Case from Clause Function

For each item: (1) Gender, (2) Case, (3) Number of the relative pronoun; (4) identify its Antecedent; (5) translate the clause. Remember: gender/number from antecedent; case from function in relative clause.

## Drill Table

| #  | Phrase/Clause | Gender | Case | Number | Antecedent | Translation |
|----|---------------|--------|------|--------|------------|-------------|
| 1  |               |        |      |        |            |             |
| 2  |               |        |      |        |            |             |
| 3  |               |        |      |        |            |             |
| 4  |               |        |      |        |            |             |
| 5  |               |        |      |        |            |             |
| 6  |               |        |      |        |            |             |
| 7  |               |        |      |        |            |             |
| 8  |               |        |      |        |            |             |
| 9  |               |        |      |        |            |             |
| 10 |               |        |      |        |            |             |
| 11 |               |        |      |        |            |             |
| 12 |               |        |      |        |            |             |
| 13 |               |        |      |        |            |             |
| 14 |               |        |      |        |            |             |
| 15 |               |        |      |        |            |             |
| 16 |               |        |      |        |            |             |
| 17 |               |        |      |        |            |             |
| 18 |               |        |      |        |            |             |
| 19 |               |        |      |        |            |             |
| 20 |               |        |      |        |            |             |

## Answer Key

| #  | Phrase/Clause                                                                                   | Gender | Case | Number | Antecedent | Translation |
|----|-------------------------------------------------------------------------------------------------|--------|------|--------|------------|-------------|
| 1  |                                                                                                 |        |      |        |            |             |
