

BBA Chapter 17 — Peal Participle Drill

Peal Active and Passive Participles · Strong and Weak Roots · Daniel and Ezra

For each numbered Peal participle form drawn from Daniel or Ezra, identify whether it is Active (qatal pattern: qamets on R1, tsere on R2) or Passive (qtıl pattern: vocal shewa on R1, hireq-yod on R2), give the Root (three root consonants, Peal perfect 3ms form), the G/N (gender and number: ms / fs / mp / fp), and provide an English translation. Forms cover strong roots and the major weak classes: hollow II-waw (qaam pattern), III-he (final he/aleph mater), I-nun (nun retained), and I-aleph/guttural. Both absolute and determined state forms are included.
