

Chapter 27 — Niphal–Hiphil Contrast Drill

BBH Chapters 25 & 27 · Niphal and Hiphil Weak Verbs

For each form: (1) identify the stem (Niphal or Hiphil); (2) parse — conjugation, PGN; (3) give the root and weak class; (4) translate in context. Answer key is on the last page.

Niphal markers: נִּ prefix (perfect/participle); יִ / יְ / יֹ (imperfect/wayyiqtol — assimilation); יֹנִ (I- perfect/ptc); יֹיְ (I- imperfect); נִ (Biconsonantal perfect/ptc). Hiphil markers: הִ prefix (perfect); יִ (imperfect); הִ (imperative/inf.); מִ (participle) — modified for weak classes: הִ (I-gutt.), הִיְ / הִיְ / הִיְ (I-), הִ / יִ / הִ / מִ (Biconsonantal/Geminate).

Part A — Contrasting Niphal and Hiphil (same root)

Niphal = passive/reflexive. Hiphil = causative. Same root, opposite semantic direction.

Reflection Questions

- Items 1–2 (שׁ, ע, מ) and 3–4 (מ, א, צ): pick one pair and explain in one sentence what the Niphal adds and what the Hiphil adds to the basic Qal meaning.
- Items 9–11 are all from ד, ל, י (I-I). Both stems use a holem-vav cluster. What is the precise difference between Niphal perfect ד, ל, י and Hiphil wayyiqtol י, ו, י?
- Items 16 and 17 are both apocopated III-ה wayyiqtol forms. What vowel under the prefix consonant is decisive in distinguishing Niphal from Hiphil?
- Items 18 (ה, ס, ב, Hiphil Geminate imperative) and 20 (ה, א, ר, Hiphil III-ה imperative) both have a long prefix vowel rather than the expected strong ה/ה. Explain the phonological reason for the long vowel in each case.
